</tbody>
</table>
Current situation and challenges

• Around 40% of all initial CTA dossiers are now submitted through the CTR pilot project

  ➢ Continuous progress of the CTR pilot 😊

• But second wave of the COVID-19 pandemic

  ➢ Direct impact: increase of COVID-19 CTA dossiers
  ➢ Indirect impact: decrease of our capacity for non-COVID-19 dossiers (Pilot and Directive)

  ➢ Additional resources are foreseen but in the meantime we experience delays in handling a part of the CTA dossiers
Temporary procedure with time slots

- Measures have been taken to reinforce the R&D teams, however not yet in place

- Temporary procedure: limit the number of CTR pilot initial trials accepted per period of time (2 per week) to stabilize the situation

- The procedure with time slots does not apply to COVID-related initial trials nor Substantial Modifications.
Temporary procedure with time slots

• A web application with time slots will be available for sponsors/applicants from 8 February 2021 on our website.

• This will allow sponsors/applicants to book a time slot for the submission of an initial CTR pilot dossier as of 15 February 2021.
What if a sponsor/applicant cannot find a time slot?

• At this moment, we are looking for a solution, i.e. a hybrid pathway, where sponsors who have prepared their application according to the CTR pilot project but no time slot is available anymore.

• Discussions are ongoing with the College and the ECs
How to book a time slot?
How to book a time slot?

Federal agency for medicines and health products (FAMHP)

Every week, **two time slots** are available: on **Tuesday and Thursday at 10 AM**.

Please note: we expect you to submit your dossier the week that you have booked a time slot or the week after at the latest.

Conclusion

• CTR pilot project, including VHP plus process, remains the best way for all involved to train the future CTR conditions

• The CTR pilot project will continue until the implementation of the Clinical Trial Regulation

• The enthusiasm and massive participation to the CTR pilot is highly appreciated by the College and FAMHP, however, due to the particular circumstances, we need to introduce time slots, only for initial non-COVID-19 trials.

• We intend to return to our normal procedure with full acceptance of all proposed dossiers for the CTR pilot as soon as possible
Your medicines and health products, our concern
